EDUCATION

Associates of Science in Engineering (GPA: 4.0) | College of the Canyons, Santa Clarita, CA *Received 06/2026*
Relevant coursework: Calculus I, II, & III, Differential Equations, Linear Algebra, Thermodynamics/Modern Physics, Electricity & Magnetism, Mechanics of Solids & Fluids, General Chemistry I & II, Engineering Statics, Engineering Dynamics, Solids Modeling w/ SolidWorks

WORK EXPERIENCE

NASA RockSat 2026 Project Manager | Astronomy & Physics Club @ COC *09/2025 – Present*

- Managed an engineering project consisting of 7 leads while interacting with NASA Wallops Flight Facility (WFF)
- Used the *libcamera* C++ API and multithreading to capture and save footage from two cameras simultaneously with a rolling filenames system
- Developed the branding, logo, and design associated with the slideshows, agendas, and task lists

Mathematics & Physics Tutor | College of the Canyons, Valencia, CA *06/2025 – Present*

- Received the *Dr. Ram Manvi Academic Excellence Award* for maintaining a 4.0 GPA while providing outstanding tutoring
- Helped 20+ students across Linear Algebra, Calculus, Calculus-Based Physics, Computer Science, and Chemistry
- Led Mathematics and Physics Academic Excellence Workshops and crafted unique problems to solve with students

NASA RockSat 2025 Software Engineering Lead | Astronomy & Physics Club @ COC *08/2024 – 09/2025*

- Lead a team of 4 members in developing space-grade programs to capture and analyze flight data
- Developed a monolithic Node.JS web application capable of reading data from a Linux computer, analyzing it, and generating graphical visualizations; supplemented with a daemon written in the C language
- Hosted “An Interface to Web Design & Development”, a workshop presented to 30+ students, who learned how to turn a hand-written design, to a functioning web application

Courtesy Clerk | Stater Bros. Markets, Santa Clarita, CA *06/2023 - 10/2024*

- Displayed excellency in customer service while reinforcing given procedures and protocols
 - Mitigated conflict and supported the organization of the market
-

VOLUNTEER EXPERIENCE

President & Vice President | Astronomy & Physics Club @ COC *08/2023 – 08/2024 & 08/2024 – 08/2025*

- Boosted member retention by mentoring several new members, including high school and college students
- Provisioned the development of three successful engineering missions: NASA RSX, NASA HASP, and NASA RockOn!
- Organized a club Discord server complete with organized chats, voice calls, and a team management system that encourages collaboration and project development

NASA RockOn! 2024 | NASA Wallops Flight Facility *06/2024 - 06/2024*

- Collaborated with 2 other students to build a radiation-detecting payload on a NASA sounding rocket
- Learned how to solder, procedurally test a space-bound payload, program a Geiger counter, mechanically integrate a payload, and analyze data using Microsoft Excel
- Networked with community college and university students from across the United States
